## Education

---

### George Washington University

MS in Data Science

– Sponsored by

**Korean Government Scholarship Program**

Washington DC, USA

September, 2020–Present

### Seoul National University

B.S. in Animal Science and Biotechnology, GPA: 3.97

– Relevant Coursework

**Linear Algebra, Statistics**

Seoul, South Korea

2014–2020

## Experience

---

### Children's National Hospital

Research Intern

- Develop a deep learning algorithm for computer-aided parathyroid detection using both RGB/NIR images and YOLO.

Washington, D.C.

Sep 2021 – Present

### SOCAR

Data Analyst - Internship

- Provide analytical support for building targeted business strategies based on the history of users.
- Assist with or perform: manage and analyze data, perform statistical analysis, and visualize and share results with coworkers.

Seoul, South Korea

2019

## Skills

---

- **Programming:** Python, SQL, JS
- **Machine Learning:** Tensorflow, Pytorch
- **Visualization:** Tableau, D3

## Languages

---

- **English:** Proficient
- **Korean:** Mother tongue, native speaker

## Projects

---

### NIH Codeathon: Building Insights on Vaccine Hesitancy

- Created website for visualization that can dynamically interact with end user by using Tableau.

2021

### Kidney Image Segmentation

- Developed an image segmentation model that can identify a functional unit called glomerulus with approximately 92% dice accuracy by updating weights of pre-trained UNET.

2021

## Scholarships and Awards

---

- Korean Government Scholarship Program for Study Overseas

2020-2022
